Day - 2

03 March 2026 20:39

SPL Command:-

1. Addcoltotal
2. Addtotal.
3. dedup
4. fillnull
5. Head
6. Tail

Visualization:

1. Chart
2. Timechart.
3. Geomap
4. Single Value Visualization.
5. Trellis

1. **Addcoltotal:-** Addition of column wise.

2. **Addtotal:-** Row wise Addition

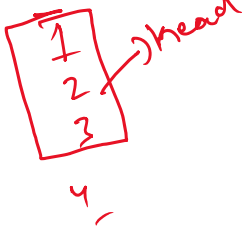
3. **Dedup:-** It will remove the duplicate values

   |dedup f1

   |dedup f1, f2

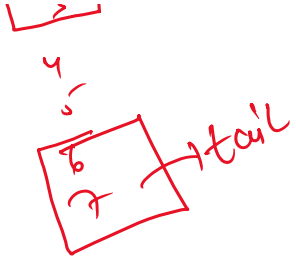
4. **fillnull:-**

5. **Head & Tail:-**



|head3

|tail2



Visualization:-

① Chart:-

|chart count by Severity.

count → y-axis

Severity → x-axis.

② Time chart:-

|timechart count by Severity

↓

|timechart span = 1d count by severity.

↓

day

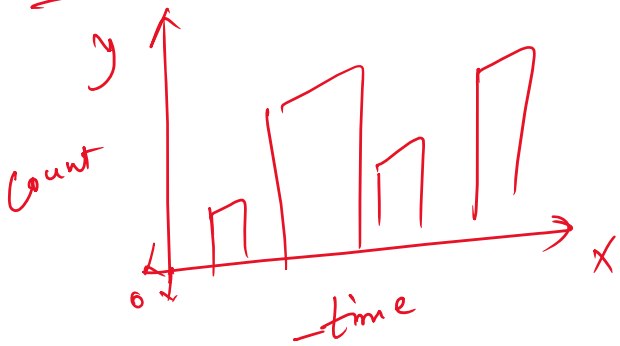
mon → month

y → year

q → Quater

d → days

s → second.



③ GeoMap:-

Coordinates → Latitude, Longitude.

|geostats count by f1 latfield = ____ longfield = ____

| stats count by f1

longfield

4. Single Value Visualization :-

Knowledge object :-

Bucket

1. Field extraction :-

- Regular expression → pattern based extraction.
- Delimiter → splitting of event on the basis of symbols.

2. LookUp :-

- CSV
- Kvstore
- Geospatial
- Database LookUp
- External LookUp.

① CSV lookup :-

① file in csv format.
② uploaded in splunk not index.
③. Small set of data / static in nature.

Index

① Continuous Data.
② Size of data is huge
③ Searching is fast.

①. upload Lookup file.
② Combine | Compare data b/w index & Lookup.
③. Lookup Definition.
④. Automatic Lookup.

①. Replace :- Substituting the value.

| replace <old-VALUE> WITH <new-value> IN <field>

②. fields → fields + f1, f2 → Add the field in the o/P.
fields − f1, f2 → Remove the field from the o/P.
